

***Specified Caregiver Showering System
Includes Telescopic & Pivoting Rod and curtain***

Shall be designed to shield caregiver attendant from water while allowing reachable access to assist bather. The shower rod shall be constructed of 18 gauge stainless steel with telescopic feature allowing rod to extend to a range of 39" to 60" and shall pivot to allow clear attendant access and easy bather transfers from walker or wheelchair without removal. The curtain must meet or exceed the following requirements. Curtain shall be equipped with weights in bottom seam to resist drifting, engineered and tailored specifically for use in commercial ADA size showers and tubs or residential size barrier-free, curb-less and low threshold shower stalls or bathtubs. The width shall be 66" or a minimum six inches greater than a 60" shower opening to prevent water spillage in corners. The curtain length shall be at a standard care attendant 33" height providing full side to side access within the shower stall. When installed in shower stalls, curtain must touch the floor of the shower to effectively control water spillage. Material shall be a nylon fabric, standard color white, machine washable, splash, mildew and fungus resistant and shall include clear shower hooks.

Caregiver Showering System shall be provided for the following showers (Insert fixture #) by KR Specialties Inc. Ph: (781)422-2273
