

### ***Specified Weighted Shower Curtain Commercial applications***

Shall be equipped with heavy tape weights in bottom seam engineered and tailored specifically for use in commercial barrier-free, curb-less, or low threshold shower stalls. The curtain must meet or exceed the following requirements. The width shall be a minimum of six inches greater than the pre-determined shower opening. The curtain length shall be a standard 72" height unless custom specified and must touch the floor of the shower to effectively control water spillage. Material shall be a soft polyester fabric, standard color white, machine washable, splash resistant, bacterial resistant, stain resistant, and flame resistant. Material shall meet all state and federal code compliance regulations. Each curtain shall include twelve clear plastic hooks. Curtain shall be provided for showers (Insert fixture #) by KR Specialties Inc. Ph: (781)422-2273
