

Weighted Curtains for residential applications

Shall be equipped with heavy tape weights in bottom seam engineered and tailored specifically for use in commercial barrier-free, curb-less, or low threshold shower stalls. The curtain must meet or exceed the following requirements. The width shall be a minimum of six inches greater than the pre-determined shower opening. The curtain length shall be a standard 74" height unless custom specified and must touch the floor of the shower to effectively control water spillage. Material shall be a soft polyester fabric, standard color white, machine washable and splash resistant. Each curtain shall include twelve clear plastic hooks. Curtain shall be provided for showers (Insert fixture #) by [KR Specialties Inc.](http://www.kr-specialties.com) Ph: (781)422-2273
